Summary

Computer Science undergraduate with hands-on experience as a Support Engineer Intern, working with Linux, Jenkins, Kibana, ITIL-based incident management, and production banking environments. Passionate about DevOps, automation, cloud technologies, and CI/CD. Seeking a DevOps internship where I can apply my operational experience while expanding my cloud and infrastructure engineering skills.

Education

NSBM Green University, Bsc (Hons.) in Computer Science

Aug 2022 – Dec 2026

Experience

Intern Support Engineer, ideahub (pvt) ltd – Nugegoda, Sri Lanka

Jan 2026 – July 2026

- Aligned daily support operations with ITIL frameworks, effectively managing application-related customer incidents and service requests.
- Coordinated manual release deployments via Jenkins, ensuring zero-downtime updates and strict compliance with delivery protocols.
- Utilized Kibana APM and log analysis to investigate and resolve production incidents, diagnosing complex system errors and ensuring the availability and stability of critical banking applications.

Projects

SriTop: System Monitor for Linux

Real-time terminal-based system resource monitor built with Python and Textual, providing htop-like functionality with intuitive UI for monitoring CPU, memory, disk usage, and processes in Linux environments.

- [Link](#)

Tubefetch: CLI Youtube Downloader

Terminal-based Node.js CLI for downloading YouTube videos from URLs, with built-in rate limiting, URL validation, and protections against command injection.
